Waka Memories

Wakarusa Community School

Wakarusa, Indiana

Foreword

The Waka Memories of 1967 has pictured Faces to Remember through the events and happenings that have taken place while we were students at Wakarusa High School. We hope that as you leaf through this book in future years you will recall many faces of teachers, classmates, and friends through the years.

We, the staff, want to thank the underclassmen, the faculty, and all those that have participated in the making of our book. We especially want to thank Mr. Rogers who has helped us very much in our plans and ideas for this year's yearbook.

A black and white photograph of a hand holding a piece of chalk, writing on a chalkboard. The hand is positioned in the lower right quadrant, with the index finger pointing towards the center. The chalkboard is covered with various white markings, including numbers like '3', '1', '100', and '5', and symbols like a plus sign and a dollar sign. The text 'FACULTY', 'ACTIVITIES', and 'CLASSES' is overlaid on the image in a bold, sans-serif font. The background is dark and textured, suggesting a chalkboard surface.

Wishes to Say a
BIG THANK YOU
to All Our Advertisers

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office of National Statistics 1999).

There is a growing awareness of the need to address the needs of older people in the community. The Department of Health (1999) has published a strategy for older people, which sets out a vision for the future of older people's health and social care. The strategy is based on the following principles:

- Older people should be able to live independently in their own homes for as long as possible.
- Older people should be able to access the services and support they need to live well.
- Older people should be able to participate in decisions about their care and support.

The strategy also sets out a number of key objectives for the future of older people's health and social care. These include:

- Improving the health and well-being of older people.
- Ensuring that older people have access to the services and support they need to live well.
- Ensuring that older people are able to participate in decisions about their care and support.

The strategy is a key document for the future of older people's health and social care in the UK. It sets out a vision for the future and provides a framework for the development of policies and services for older people.

There is a growing awareness of the need to develop services to meet the needs of the ageing population. The Department of Health (1999) has published a strategy for ageing, which sets out the government's commitment to improve the lives of older people. The strategy is based on three main principles: (1) to ensure that older people are able to live independently and actively; (2) to ensure that older people are able to access the services they need; and (3) to ensure that older people are able to participate in the decisions that affect their lives.

The strategy is based on the following assumptions: (1) that older people are a diverse group with different needs; (2) that older people are able to live independently and actively; (3) that older people are able to access the services they need; and (4) that older people are able to participate in the decisions that affect their lives. The strategy is based on the following principles: (1) to ensure that older people are able to live independently and actively; (2) to ensure that older people are able to access the services they need; and (3) to ensure that older people are able to participate in the decisions that affect their lives.

There is a growing awareness of the need to develop services to meet the needs of older people, and the need to ensure that the services that are developed are based on evidence of what works. The Department of Health (2000) has published a strategy for older people, which sets out the government's commitment to improve the lives of older people, and to ensure that they are able to live independently and actively for as long as possible.

The strategy is based on three main principles: (1) to ensure that older people are able to live independently and actively for as long as possible; (2) to ensure that older people are able to participate in the decisions that affect their lives; and (3) to ensure that older people are able to live in the communities in which they wish to live. The strategy also sets out a number of specific objectives, which are to be achieved by the year 2010.

The strategy is a key document in the development of services for older people, and it is essential that all those involved in the development of such services are aware of its contents. The strategy is a living document, and it will be updated as more evidence becomes available about what works.
